Thank you for all these data contributions. Some highlights this month include: getting Andre back from his travels (our growth often takes a dip when Andre is at conferences!); Rob Simmons and Marlei Martins have used the App to collate many of their raptor sightings from off the piste locations around Namibia, adding to Holger and Claire Kolberg's coverage; lots of raptor monitoring by Dirk van Stuyvenburg and Crystelee Wilson from important regions in South Africa; Brian Waswala continues to submit data on raptors in his region of Kenya.

Best wishes,
Rob and ARDB team
