

Update from the African Raptor Databank for November 2016

November proved to be a prolific month with 6,733 records added taking the data bank tally from 144,671 to 151,329 observations.

Highlights this month included more than 2,500 historical and recent observations from Volker Salewski and a further 592 observations from Bram Piot for west Africa which provided much needed data for this region. Data from surveys organised around the 14th PAOC in Senegal aimed particularly at gathering vulture sightings data were also submitted (thanks Ralph Buij, Wim Mullie, Keith Bildstein, Lindy Thompson, Evan Buechley, Darcy Ogada, Jean-Marc Thiollay and colleagues); Brian Waswala provided more than 700 observations from Kenya and great coverage of South African and Namibian roads continued.

Records were kindly supplied by the following raptor observers:
