Thank you all for these contributions. Some monthly highlights include: Evan Buechley's timeous and important sightings from Ethiopia (very relevant to the vulture mapping work); considerable new data for Botswana gathered on a trip by Bernard and Antje Madden – they also covered northern Cape with Dawie de Swardt; excellent ongoing road count data for the Garden Route and eastern Cape Karoo by Mark Dixon and Amanda Judson; more western Kenya sightings by Washington Wachira and Brian Waswala.

Best wishes,
Rob and ARDB team
