

**update from the African Raptor Databank for September 2016:**

5576 records added during September taking the total in the database from 137572 to 143148

Highlights include: large datasets of Karoo road counts by Ronnelle Visagie for 2015 and 2016; excellent new data for Ethiopia and northern Kenya; data to fill the gap in Mozambique (Fraser Gear); continued excellent coverage of southern African roads. Good use of the new iOS App in beta (testing) version.

Records were kindly supplied by the following raptor observers (spreadsheets in green, iOS app in orange, remainder Android app):
